

Precision Oncology AI Analysis

Case ID: NEW-PATIENT-7863

Analytical Date: August 25, 2026 | 00:25

Patient Information		Clinical Indicators	
Full Name:	N/A	Tumor Stage:	N/A
Age:	N/A	Tumor Grade:	N/A
Gender:	N/A	Metastasis:	N/A
Hospital ID:	N/A		
Contact:	N/A		

AI Prognosis Metrics

Survival Probability (5-Yr)	45.99%
Recurrence Risk	12.62%
Aggressiveness Score	35.0/100

Diagnostic Intelligence & Gene Matching

Comparative analysis across 5 clinical matches indicates a moderate survival trajectory with low recurrence potential. The genomic fingerprint shows significant correlation with historical cases matching your 3 dominant marker(s).

Prognosis is heavily influenced by the expression of 3 dominant markers. Notably, the presence of ENSG00000276168.1 correlates with a 62.8% recovery rate in the matched cohort, suggesting a favorable biological response pathway.

Genomic Recovery Benchmarks

Dominant Marker	Cohort Survival Rate	Impact Level
ENSG00000276168.1	62.8%	Moderate
ENSG00000277437.1	60.0%	Moderate

ENSG00000198804.2	43.6%	Moderate
